INSTITUTIONAL GOVERNANCE

A flexible governance mechanism allows the institution to make significant strides towards the realization of its goals. Governance is based on the themes of:

➢ **Autonomy and oversight**
Each school and administrative function sets their own individual strategies along with the Vice Chancellor of the institution. Along with the strategy, a set of targets and boundary conditions are prescribed against which the progress towards realization of the strategy is measured.

Shared services (HR, finance, payroll management, estate management, international relations, etc.) centares are established and operated that service all the faculties.

➢ **Transparency and accountability**
Transparency is present at two levels – institution to external stakeholders and within the institution. For external stakeholders, annual reports, research publications, academic and process reports are published. Internally, a 360 degree feedback process along with recourse for appraisals is present. To ensure accountability, targets are set every year during the strategy decision phase, against which each function is measured.

➢ **External advisory**
Statutory academic bodies like Board of Management, Academic Council and Boards of Studies are represented by external members from academia and industry who provide useful inputs which are incorporated into the system.

  - Helping students in the courses where they are week by arranging compensatory courses

The counselors also keep all the academic records of the students allotted to them and they routinely inform the parents about their wards' progress and whenever necessary parents of the wards are called to the institute to resolve any contentious issues associated with the students.
